

As a subscribing customer to XM radio since its launch over a year ago, i have been pleased with the fact that i can get a wide variety of news and music channels when i feel like. I fully support XM radio having the ability to do provide Traffic and Weather updates, after all i AM PAYING for the service, and allowing XM RADIO to broadcast traffic and weather updates will give me information i need on demand to help me plan my trip to the beach, or even my route home from work.

I respectfully urge the FCC to reject the petition 04-160 brought forth from the National Association of broadcasters.

Thank you for reading this,
Alexander Rice
